

# Viper 2000

## In-line High Frequency TIG Control Unit

The Viper 2000 is one of the smallest and lightest high frequency DC TIG control units available. This versatile unit operates from the open circuit voltage of any DC constant current power source or generator.

It is also extremely easy to use and is powered directly from the power source without the need for any auxiliary supply cables.

The sturdy and practical design of this exceptionally portable unit makes it suitable for use in any working environment.

### Main Features

- Solid state arc ignition
- Post gas timing
- Torch switch latching
- Argon flow meter
- Protected against damage caused by incorrect polarity connection

### Applications

Ideal for typical site applications

Technical data		Viper 2000
Input Voltage Range		40-100 Volts
Maximum Output Current	TIG	200 amps
Duty Cycle		100% @ 200amps
Degree of Protection		IP23
H x W x L (mm)		210 x 127 x 322
Weight (kg)		5
Gas Flowmeter		Yes
